Descriptive Report

to accompany

Photographic copy of Register 1746.

H. A. Seran, Asst., Chief of Party.

In revising the shore line of Guemes Island, it was also decided to rerun the water front of Anacortes as the wharves had all been changed since the last revisions shown on the chart.

The field work was done on a separate sheet, without projection, as the old triangulation stations were not recovered. The topography was swung in by tangent cuts, the beginning of the cliff to the northward of Guemes P.O., and the shore line to the Eastward and Westward of Anacortes.

This survey shows all the wharves in existence at Anacortes at the present time and there are no new ones in the course of construction.

Original field sheet enclosed.

Respectfully submitted,

H. A. Seran
Asst., C. & G. Survey.
